REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 31ST MARCH 1930.

THE more outstanding features of the vital statistics of Scotland for the first quarter of the year 1930 are a birth-rate of 19·7 per thousand, a marriage-rate of 6·1, and a death-rate of 15·8.

The quarterly birth-rate is 1·9 more than that of the previous quarter and 0·3 more than that of the first quarter of last year, but is markedly lower than the mean of those of recent years. It is 3·3 lower than the mean of those of the first quarters of the preceding ten years.

The marriage-rate of the quarter, 6·1 per thousand, is 0·7 less than that of the previous quarter, but is 0·5 more than that of the first quarter of last year.

The death-rate of the quarter, 15·8 per thousand, is 3·4 more than that of the previous quarter, but is 6·1 less than that of the first quarter of last year, when influenza was prevalent in the country. It is 1·3 less than the mean of the death-rates of the first quarter of the preceding ten years.

The illegitimate children registered during the quarter numbered 1,796, and are 163 more than in the previous quarter but 31 fewer than in the first quarter of last year. The infantile mortality rate of the quarter was 110 per thousand registered births. This rate is 30 more than that of the previous quarter, but is 18 less than that of the first quarter of last year.

The death-rates per 100,000 from all forms of tuberculosis and from tuberculosis of the respiratory system were 96 and 67 respectively, both of which rates, while being higher than in the previous quarter, are lower than in the first quarter of last year.

Deaths from malignant disease numbered 1,750 and equalled a death-rate of 145 per 100,000. These deaths number 63 fewer than in the previous quarter, but 18 more than in the first quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 194 and equalled a mortality rate of 8·2 per thousand registered births. This number is 64 more than in the previous quarter, but is 3 fewer than in the first quarter of last year.

Deaths from violent causes in all numbered 804, which is 42 more than in the previous quarter and 53 more than in the first quarter of last year. Of these deaths 152 were attributed to accidents with motor vehicles, which number is 41 less than in the previous quarter but 23 more than in the first quarter of last year.

BIRTHS.

The births of 23,684 living children were registered during the first quarter of the year 1930. This number is 1,686 more than that of the

* Including population of Bute County as shown in Table A.

previous quarter and 235 more than that of the first quarter of last year, but is 1,092 less than the mean of those of the first quarters of the preceding five years and 4,145 less than the mean of those of the first quarters of the preceding ten years. The only recent first quarters in which a smaller number of births were registered in Scotland were those of the years 1918, 1919 and 1929. The maximum number of births registered in a first quarter occurred in 1920 and was 37,751.

The Scottish birth-rate of the quarter was 19·7 per thousand. This rate is 1·9 more than that of the previous quarter and 0·3 more than that of the first quarter of last year, but is 0·8 less than the mean of those of the first quarters of the preceding five years and 3·3 less than the mean of those of the first quarters of the preceding ten years.

Of the 23,684 children whose births were registered during the quarter 12,023 were males and 11,661 were females, the ratio of males to females being 103·1 to 100. In the previous quarter this ratio was 106·7 to 100, while in the corresponding quarter of last year it was 107·1 to 100.

In the divisions of the counties the quarterly birth-rate varied from 21·7 in the South-Western and 20·2 in the North-Eastern, to 14·0 in the Northern and 15·7 in the North-Western. In the Southern it was 18·7, in the South-Eastern 18·1, in the West-Midland 17·8, and in the East-Midland 17·5.

In the counties, burghs included, the quarterly birth-rate varied from 22·5 in Lanark, 21·7 in Banff, 21·4 in West Lothian and 20·4 in Aber-

deen, to 9·7 in Bute, 10·2 in Shetland, 12·1 in Kinross, 12·8 in Berwick and 13·0 in Orkney.

In the larger burghs taken collectively the quarterly birth-rate was 21·1 per thousand, in the smaller burghs 17·8, and in the county districts 18·6. In the previous quarter these three rates were 18·9, 16·0 and 17·2. In the first quarter of last year they were 20·6, 17·6 and 18·7.

In the burghs with populations of over 30,000 the quarterly birth-rate varied from 27·1 per thousand in Hamilton, 26·0 in Coatbridge, 22·7 in Greenock and 22·4 in Glasgow, to 15·7 in Dunfermline, 16·3 in Perth, 16·8 in Kirkcaldy and 18·0 in Edinburgh.

In burghs with populations of between 10,000 and 30,000 the quarterly birth-rate varied from 26·7 in Johnstone, 24·7 in Peterhead, 24·3 in Airdrie and 23·4 in Barrhead, to 9·5 in Montrose, 12·2 in Gourrock, 13·2 in Galashiels and 15·4 in Musselburgh.

In the county districts with populations of over 10,000, the quarterly birth-rate varied from 25·5 in Ayr District of Ayr, 24·5 in Thornhill District of Dumfries, 24·0 in Middle Ward District of Lanark and 23·1 in Kilmarnock District of Ayr, to 9·6 in Mainland District of Shetland, 10·5 in Lower District of Renfrew, 11·3 in Highland District of Perth and 12·9 in Western District of Perth.

Of the 23,684 children registered during the quarter, 21,888 or 92·4 per cent. were legitimate, while 1,796 or 7·6 per cent. were illegitimate. Compared with the number in the previous quarter that of legitimate children is 1,521 more and that of illegitimate children 163 more. Compared with the number in the first quarter of last year that of legitimate children is 266 more but that of illegitimate children is 31 fewer. The illegitimate rate of the quarter, 7·6 per cent., is 0·2 more than that of the previous quarter but 0·2 less than that of the first quarter of last year. The number of illegitimate births registered in this quarter is 49 more than the mean of the numbers of the first quarters of the preceding five years, but is 146 less than the mean of those of the first quarters of the preceding ten years.

In the divisions of the counties the illegitimate rate of the quarter varied from 13·1 per cent. in the North-Eastern Division and 12·2 in the Southern, to 6·6 in the South-Western and in the South-Eastern. In the Northern Division this percentage was 8·6, in the East-Midland 7·7, in the North-Western 7·2 and in the West-Midland 6·9.

In the counties, burghs included, the illegitimate rate of the quarter varied from 15·9 in Wigtown, 14·3 in Kincardine and in Peebles, 13·5 in Argyll and in Moray, and 13·3 in Aberdeen, to 1·4 in Orkney, 4·3 in Bute, 4·6 in West Lothian and 4·8 in Renfrew.

In the larger burghs taken collectively the illegitimate rate was 6·9 per cent., in the smaller burghs 7·4 per cent., and in the county districts 8·9 per cent. In the previous quarter these three rates were 6·8, 7·6 and 8·5, while in the first quarter of last year they were 6·7, 7·7 and 9·7.

In the larger burghs taken individually the quarterly illegitimate rate varied from 10·6 per cent. in Aberdeen, 9·0 in Dundee, 8·1 in Motherwell and Wishaw and 7·7 in Hamilton, to 4·4 in Greenock, 4·5 in Paisley, and 4·9 in Coatbridge and in Falkirk.

Year 1930 .										

In burghs with populations of between 10,000 and 30,000 the illegitimate rate varied from 20·8 per cent. in Montrose, 14·3 in Fraserburgh, 13·9 in Stirling and 13·4 in Barrhead, to 1·6 in Kirkintilloch, 2·4 in Johnstone, 2·7 in Arbroath and 2·8 in Rutherglen.

In county districts with populations of over 10,000 this rate varied from 20·7 in Garioch District of Aberdeen, 19·6 in Deeside District of Aberdeen, 19·2 in Deer District of Aberdeen and 19·0 in Rhins District of Wigtown, to 2·6 in Lower District of Renfrew, 2·7 in Eastern District of Dumbarton, 2·8 in Mainland District of Shetland and 3·0 in Western District of Perth.

Births registered in Scotland in January numbered 8,091, in February 7,374 and in March 8,219. In January the monthly birth-rate was 19·5, in February 19·7 and in March 19·8. In the previous year these three birth-rates were 19·8, 19·6 and 18·9 respectively.

The quarterly birth-rate in England and Wales was 16·2 per thousand and in Northern Ireland 20·4, the former being 3·5 less but the latter 0·7 more than the Scottish rate.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 7,298. This number is 1,147 less than that of the previous quarter, but is 563 more than that of the first quarter of last year; it is 91 less than the mean of the numbers of the first quarters of the preceding five years and 994 less than the mean of those of the first quarters of the preceding ten years.

The quarterly marriage-rate was 6·1 per thousand. It is 0·7 less than that of the previous quarter, but 0·5 more than that of the first quarter of last year. It is the same as the mean of those of the first quarters of the previous five years, but is 0·8 less than the mean of those of the first quarters of the preceding ten years.

In the counties, burghs included, the quarterly marriage-rate varied from 8·4 in Shetland, 7·0 in Lanark and in Midlothian, 6·7 in Clackmannan and 6·5 in Aberdeen, to 2·1 in Bute, 2·4 in Sutherland, 3·2 in Kinross and 3·3 in Argyll and in Caithness.

In the larger burghs taken collectively the quarterly marriage-rate was 7·1 per thousand, in the smaller burghs 6·3, and in the county districts 4·2. In the previous quarter these three rates were 8·2, 6·7 and 4·8, and in the first quarter of last year they were 6·7, 5·5 and 3·9.

In the larger burghs taken individually the marriage-rate of the quarter varied from 8·5 in Aberdeen, 7·7 in Glasgow, 7·6 in Perth and 7·3 in Edinburgh, to 4·8 in Clydebank and in Dunfermline, 5·1 in Coatbridge and 5·3 in Paisley.

In burghs with populations of between 10,000 and 30,000 this rate varied from 13·2 in Inverness, 10·2 in Bo'ness and 9·4 in Kirkintilloch, to 1·4 in Gourock, 3·2 in Montrose and 3·8 in Hawick.

In county districts with populations of over 10,000 the quarterly marriage-rate varied from 7·0 per thousand in Central District of Stirling, and 6·6 in Ayr District of Ayr and in Western District of Dumbarton,

to 1·1 in Forfar District of Angus, 1·6 in Easter Ross District of Ross and Cromarty and 1·7 in Western District of Stirling.

Marriages registered in January numbered 3,220, in February 1,812 and in March 2,266. In January the monthly marriage-rate was 7·8, in February 4·8 and in March 5·5. In the previous year the marriage-rate in January was 7·6, in February 4·7 and in March 4·3.

DEATHS.*

Deaths registered in Scotland during the first quarter of the year 1930 numbered 19,052. This number is 3,699 more than that of the previous quarter, but is 7,334 less than that of the first quarter of 1929. It is 1,245 less than the mean of those of the first quarters of the preceding five years and 1,573 less than the mean of those of the first quarters of the preceding ten years.

The quarterly Scottish death-rate was 15·8 per 1000. It is 3·4 more than that of the previous quarter, but 6·1 less than that of the first quarter of last year. It is 1·0 less than the mean of those of the first quarters of the preceding five years and 1·3 less than the mean of those of the first quarters of the preceding ten years.

In the divisions of the counties the quarterly death-rate varied from 17·7 in the Southern and 17·4 in the North-Western, to 14·1 in the West-Midland and 15·4 in the East-Midland. In the Northern Division it was 16·5, in the South-Western 16·3, in the East-Midland 15·4 and in the North-Eastern 14·7.

In the counties, burghs included, the quarterly death-rate varied from 20·6 in Roxburgh, 20·5 in Orkney, 17·7 in Kirkcudbright and 17·6 in Ross and Cromarty, to 10·6 in Kinross, 12·3 in Shetland, 12·5 in Peebles and 13·1 in Dumbarton.

In the larger burghs taken collectively the death-rate of the quarter was 16·9, in the smaller burghs 16·0 and in the county districts 14·1. In the previous quarter these three rates were 13·4, 12·2 and 11·1. In the first quarter of last year they were 24·2, 20·7 and 18·8.

In the larger burghs taken individually the quarterly death-rate varied from 20·1 in Paisley, 18·6 in Coatbridge, 18·5 in Dundee and 17·6 in Glasgow, to 11·6 in Ayr, 12·6 in Dunfermline, 12·8 in Clydebank and 13·6 in Falkirk. In Edinburgh this rate was 16·8 and in Aberdeen 14·9.

In burghs with populations of between 10,000 and 30,000 the quarterly death-rate varied from 28·4 per thousand in Hawick, 19·6 in Dumfries, 19·3 in Montrose and 18·4 in Inverness, to 11·4 in Musselburgh, 11·7 in Fraserburgh, 12·0 in Kirkintilloch and 12·6 in Dumbarton and in Saltcoats.

In county districts with populations of over 10,000 the death-rate varied from 23·2 in Skye District of Inverness, 18·1 in Mid-Ross District of Ross and Cromarty, 17·7 in Rhins District of Wigtown and 17·3 in Perth District of Perth, to 9·5 in Turriff District of Aberdeen, 9·8 in

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

Lower District of Renfrew, 10·6 in Western District of Perth and 11·4 in Annan District of Dumfries.

Deaths registered in January numbered 6,119, in February 6,112 and in March 6,821. The monthly death-rate in January was 14·8, in February 16·3 and in March 16·5. In the previous year these three monthly death-rates were 25·5, 23·4 and 16·9.

In England and Wales the quarterly death-rate was 13·5 per thousand and in Northern Ireland 16·9, the former being 2·3 less but the latter 1·1 more than the Scottish rate.

AGES OF THOSE DYING.

Of the 19,052 persons whose deaths were registered during the quarter, 3,797 or 19·9 per cent. were children of less than five years old, 7,277 or 38·2 per cent. were persons aged 5 to 65, and 7,978 or 41·9 per cent. were persons aged 65 and over. Compared with the number in the corresponding quarter of last year deaths of children of less than five years old are 1,284 fewer, those of persons aged 5 to 65 are 2,524 fewer, and those of persons aged 65 and over are 3,526 fewer.

Deaths of children of less than one year old numbered 2,598, and as the births registered during the quarter numbered 23,684, these deaths equal an infantile mortality rate of 110 per thousand registered births. These deaths number 831 more than in the previous quarter but 415 fewer than in the first quarter of last year. They number 117 less than the mean of the numbers of the first quarters of the preceding five years and 539 less than the mean of those of the first quarters of the preceding ten years. The infantile mortality rate of the quarter is 30 more than that of the previous quarter but 18 less than that of the first quarter of last year. It equals the mean of those of the first quarters of the preceding five years, but is 3 less than the mean of those of the first quarters of the preceding ten years.

In divisions of the counties the infantile mortality rate of the quarter varied from 118 in the South-Western and 109 in the West-Midland, to 66 in the Northern and 80 in the North-Western. In the Southern Division this rate was 105 per thousand, in the East Midland 104, in the South-Eastern 103 and in the North-Eastern 102.

In the counties, burghs included, the infantile mortality rate varied from 159 per thousand in Wigtown, 128 in Stirling, 127 in Angus and 126 in Renfrew, to 17 in Shetland, 22 in Bute, 24 in Berwick and 43 in Peebles.

In the larger burghs taken collectively the infantile mortality rate was 120, in the smaller burghs 101 and in the county districts 97. In the previous quarter these three rates were 91, 68 and 68 respectively. In the first quarter of last year they were 144, 114 and 109.

In the larger burghs taken individually the infantile mortality rate varied from 154 in Coatbridge, 150 in Paisley, 134 in Dundee and 129 in Greenock, to 42 in Ayr, 68 in Dunfermline and 84 in Kilmarnock. In Glasgow this rate was 127, in Edinburgh 114 and in Aberdeen 100.

The infantile mortality rate of the quarter in England and Wales was 77 per thousand registered births, and in Ireland 78, the former being 33 and the latter 32 less than the Scottish rate.

CAUSES OF DEATH.

Of the 19,052 deaths registered during the quarter, 866 or 4·5 per cent. were attributed to the principal epidemic diseases. These 866 deaths included 4 from enteric fever, 355 from measles, 44 from scarlet fever, 178 from whooping-cough, 157 from diphtheria, and 128 from the diarrhoeas of childhood. Compared with the number in the previous quarter, deaths from measles numbered 259 more, from whooping-cough 97 more, from diphtheria 22 more and from scarlet fever 5 more, but those from enteric fever are 2 fewer and from the diarrhoeas of childhood 51 fewer. Compared with the number in the first quarter of last year, deaths from measles are 341 more and those from scarlet fever are 9 more, but those from diphtheria are of the same number, while those from enteric fever are 1 fewer, from the diarrhoeas of childhood 15 fewer, and from whooping-cough 299 fewer.

The principal epidemic diseases death-rate of the quarter was 0·7 per thousand. This death-rate is 0·3 more than that of the previous quarter, but is the same as that of the first quarter of last year. The quarterly death-rate from measles was 30 per 100,000, from whooping-cough 15, from diphtheria 13, from the diarrhoeas of childhood 11, and from scarlet fever 4.

In the counties, burghs included, the principal epidemic diseases death-rate varied from 1·3 per thousand in Lanark, 0·8 in Renfrew and in West Lothian and 0·7 in Kirkcudbright, to 0·0 in Berwick, Kinross, Nairn, Orkney and Sutherland.

In the larger burghs this death-rate varied from 2·2 in Hamilton, 1·4 in Glasgow and in Paisley and 1·3 in Coatbridge, to 0·0 in Kilmarnock, 0·1 in Dunfermline, 0·2 in Ayr and 0·3 in Clydebank. In Edinburgh it was 0·6, in Dundee 0·9 and in Aberdeen 0·4.

Deaths from epidemic diseases other than those grouped as the principal epidemic diseases included 63 from cerebro-spinal meningitis, 36 from encephalitis lethargica, 68 from erysipelas and 6 from acute poliomyelitis. Compared with the number in the previous quarter deaths from erysipelas number 30 more, from cerebro-spinal meningitis 23 more and from encephalitis lethargica 12 more, but those from acute poliomyelitis number 3 fewer.

Deaths from influenza in all numbered 287, of which 37 were attributed to influenza as the sole cause and 250 to influenza along with some contributory cause. In the previous quarter the total deaths from influenza numbered 147, of which 23 were ascribed to influenza as the sole cause.

Deaths from all forms of tuberculosis numbered 1,158, constituted 6·1 per cent. of the total deaths of the quarter, and equalled a death-rate of 96 per 100,000. These deaths numbered 182 more than in the previous quarter, but 239 fewer than in the first quarter of last year.

This death-rate is 17 more than that of the previous quarter, but is 20 less than that of the first quarter of last year. Of these deaths 801 were ascribed to tuberculosis of the respiratory system, 157 to tuberculous meningitis, 67 to abdominal tuberculosis and 133 to tuberculosis of other organs. Compared with the number in the previous quarter that of tuberculosis of the respiratory system is 108 more, that of tuberculous meningitis is 44 more, of abdominal tuberculosis 6 more, and of tuberculosis of other organs 24 more. Compared with the number in the first quarter of last year, deaths from tuberculosis of the respiratory system are 270 fewer and from abdominal tuberculosis 28 fewer, but those from tuberculous meningitis number 39 more and from tuberculosis of other organs 20 more. The quarterly death-rate from tuberculosis of the respiratory system was 67 per 100,000, which rate is 21 more than that of the previous quarter, but is 22 less than that of the first quarter of last year.

Deaths from malignant disease numbered 1,750, constituted 9·2 per cent. of the total deaths of the quarter, and equalled a death-rate of 145 per 100,000. These deaths numbered 63 fewer than in the previous quarter, but 18 more than in the first quarter of last year.

Deaths from pneumonia, exclusive of those specifically associated with influenza but including those attributed to broncho-pneumonia, numbered 2,095, constituted 11·0 per cent. of the total deaths of the quarter and equalled a death-rate of 174 per 100,000. These deaths numbered 855 more than in the previous quarter, but 1,653 fewer than in the first quarter of last year.

Deaths from bronchitis exclusive of those associated with influenza numbered 1,533, which is 793 more than in the previous quarter but 1,265 less than in the first quarter of last year. These deaths constituted 8·0 per cent. of the total and equalled a death-rate of 127 per 100,000.

Deaths from violence in all numbered 804, constituted 4·2 per cent. of the total deaths of the quarter, and equalled a death-rate of 67 per 100,000. These deaths numbered 42 more than in the previous quarter and 53 more than in the first quarter of last year.

Deaths attributed to accidents with motor vehicles numbered 152. They number 41 fewer than in the previous quarter, but 23 more than in the first quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 194, which is 64 more than in the previous quarter, but is 3 fewer than in the first quarter of last year. These deaths equal a mortality rate of 8·2 per thousand registered births, which rate is 2·3 more than that of the previous quarter, but is 0·2 less than that of the first quarter of last year.

Deaths the causes of which were ill-defined numbered 199, and those of which the causes were either not specified or merely described as "natural causes" numbered 83. In the previous quarter deaths from ill-defined causes numbered 212 and those from unspecified causes 44. In the first quarter of last year these two numbers were 263 and 80 respectively.

TABLE A.—BIRTH-, DEATH-, AND MARRIAGE-RATES OF THE COUNTIES OF SCOTLAND
DURING THE QUARTER ENDING 31ST MARCH 1930.

COUNTIES.	Population estimated to middle of 1930.	Rates per 1000 of Estimated Population.				Illegiti- mate Births per cent. of Total Births.	Infantile Mor- tality Rate per 1000 Births.
		Births.	Mar- riages.	Deaths.	Deaths from Principal Epidemic Diseases.

REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH JUNE 1930.

THE more outstanding features of the vital statistics of Scotland for the second quarter of the year 1930 are a birth-rate of 20·4 per thousand, a marriage-rate of 6·8, a death-rate of 13·1, and an infantile mortality rate of 73 per thousand registered births.

The quarterly birth-rate is 0·7 above that for the previous quarter, but 0·9 below the mean of the rates for the second quarters of the preceding five years, and 5·5 below the mean of those for the second quarters of the preceding ten years.

The marriage-rate for the quarter, 6·8 per thousand, is 0·7 above that for the previous quarter, but shows little difference from the mean for the second quarters of recent years.

The death-rate for the quarter, 13·1 per thousand, is 2·7 less than in the previous quarter and slightly below the mean for the second quarter of recent years.

The illegitimate births registered during the quarter numbered 1,845, and are 49 more than in the previous quarter. They equal a rate of 7·4 per cent. of the total births, this rate being 0·2 less than in the previous quarter.

Deaths of children aged under one year numbered 1,822, being equal to a rate of 73 per thousand registered births. This rate is the lowest recorded for any second quarter since 1913, the earliest year for which quarterly infantile mortality rates for Scotland are available.

The number of deaths from measles, while 23 fewer than in the previous quarter, remains high, being 332. In the second quarter of last year these deaths numbered only 11. One death from typhus fever was registered during the quarter.

The death-rates per 100,000 from all forms of tuberculosis and from tuberculosis of the respiratory system were 100 and 68 respectively, both of which rates are slightly higher than in the previous quarter but slightly lower than in the second quarter of last year.

Deaths from malignant disease numbered 1,679 and equalled a death-rate of 138 per 100,000. These deaths number 71 fewer than in the previous quarter and 66 fewer than in the second quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 156 and equalled a mortality rate of 6·3 per thousand registered births. This rate, while practically the same as in the second quarter of last year, is 1·9 less than in the first quarter of this year.

Deaths from violence numbered 748, being 56 fewer than in the previous quarter, but 16 more than in the second quarter of last year. Of these deaths 163 were attributed to accidents with motor vehicles, being

11 more than in the previous quarter and 18 more than in the second quarter of last year.

BIRTHS.

The births of 24,816 living children were registered during the second quarter of the year 1930. This number is 1,132 more than in the previous quarter and 436 more than in the second quarter of last year, but is 1,209 less than the mean of the second quarters of the preceding five years and 3,883 less than the mean of those of the second quarters of the preceding ten years. With the exception of the second quarter of last year, this is the lowest number of births registered in Scotland during any second quarter since 1919.

The Scottish birth-rate for the quarter was 20·4 per thousand. This rate is 0·7 above that for the previous quarter and 0·4 above that for the second quarter of last year, but is 0·9 below the mean of the rates for the second quarters of the preceding five years and 5·5 below the mean of those for the second quarters of the preceding ten years.

Of the 24,816 children whose births were registered during the quarter, 12,646 were males and 12,170 were females, the ratio of males to females being 103·9 to 100. In the previous quarter this ratio was 103·1 to 100 and in the corresponding quarter of last year it was 106·5 to 100.

In the divisions of the counties the quarterly birth-rate ranged from 22·1 in the South-Western and 21·7 in the North-Eastern, to 15·2 in the North-Western and 15·4 in the Northern. In the Southern it was 19·5 in the West-Midland 19·3, in the East-Midland 18·9 and in the South-Eastern 18·3.

In the counties, burghs included, the quarterly birth-rate ranged from 23·6 in Wigtown, 22·7 in Lanark and 22·2 in Aberdeen and in West Lothian, to 9·6 in Shetland, 11·7 in Bute, 13·4 in Argyll and 14·5 in Ross and Cromarty.

In the larger burghs taken collectively the quarterly birth-rate was 21·4 per thousand, in the smaller burghs 19·5, and in the county districts 19·3. In the previous quarter these three rates were 21·1, 17·8 and 18·6 respectively, while in the second quarter of last year they were 21·5, 17·6 and 19·0 respectively.

In burghs with populations of over 30,000 the quarterly birth-rate ranged from 25·4 in Coatbridge, 25·1 in Greenock, 23·7 in Hamilton, 22·8 in Glasgow and 22·4 in Falkirk, to 15·2 in Dunfermline, 17·2 in Edinburgh, 18·0 in Ayr and 19·8 in Perth.

In burghs with populations of between 10,000 and 30,000 the quarterly birth-rate ranged from 30·6 in Johnstone, 27·0 in Fraserburgh, 26·4 in Port-Glasgow and 26·0 in Bo'ness, to 14·3 in Galashiels, 15·1 in Arbroath, and 16·0 in Gourock and in Hawick.

In county districts with populations of over 10,000 the quarterly birth-rate ranged from 26·7 in Ayr District of Ayr, 24·7 in Turriff District of Aberdeen, 23·9 in Keith District of Banff, and 23·2 in Garioch District of Aberdeen and in Lasswade District of Midlothian, to 8·2 in Mainland District of Shetland, 11·8 in Brechin District of Forfar (Angus), 12·5 in Central District of Perth, and 13·0 in Upper District of Renfrew and in Lewis District of Ross and Cromarty.

Of the 24,816 births registered during the quarter, 22,971 or 92·6 per cent. were legitimate, while 1,845 or 7·4 per cent. were illegitimate. Compared with the number in the previous quarter that of legitimate children is 1,083 more and that of illegitimate children is 49 more. Compared with the number in the second quarter of last year that of legitimate children is 491 more, while that of illegitimate children is 58 less. The illegitimate rate for the quarter, 7·4 per cent., is 0·2 less than in the previous quarter and 0·4 less than in the second quarter of last year. The number of illegitimate births registered in this quarter is 13 more than the mean of the numbers for the second quarters of the preceding five years, but is 143 less than the mean of those for the second quarters of the preceding ten years.

In the divisions of the counties the illegitimate rate ranged from 12·5 in the Southern and 12·3 in the North-Eastern, to 5·9 in the South-Eastern and 6·1 in the West-Midland. In the Northern Division it was 11·5, in the North-Western and in the East-Midland 8·1, and in the South-Western 6·4.

In the counties, burghs included, the illegitimate rate ranged from 17·6 in Banff, 17·2 in Wigtown and 16·9 in Caithness, to 2·8 in Peebles, 4·4 in Dumbarton, 4·8 in Renfrew and 5·6 in Midlothian.

In the larger burghs taken collectively the illegitimate rate was 6·5 per cent., in the smaller burghs 7·5 per cent., and in the county districts 9·0 per cent. In the previous quarter these three rates were 6·9, 7·4 and 8·9 respectively, while in the second quarter of last year they were 7·2, 7·5 and 9·0.

In the larger burghs taken individually the quarterly illegitimate rate ranged from 8·7 in Hamilton, 8·6 in Dundee, and 8·5 in Aberdeen, to 3·0 in Clydebank, 4·2 in Dunfermline and 4·5 in Greenock.

In burghs with populations of between 10,000 and 30,000 the illegitimate rate ranged from 15·9 in Hawick, 13·0 in Montrose, 12·4 in Stirling, and 11·8 in Fraserburgh, to 0 in Irvine and in Saltcoats, 2·7 in Renfrew and 3·0 in Arbroath.

In county districts with populations of over 10,000 this rate ranged from 22·0 in Deer District of Aberdeen, 19·0 in Turriff District of Aberdeen, 18·0 in Keith District of Banff, and 17·6 in Garioch District of Aberdeen, to 2·7 in Lower District of Renfrew, 3·3 in Western District of Stirling, 4·1 in Northern District of Ayr and 4·3 in Eastern District of Stirling.

Births registered in Scotland in April numbered 8,330, in May 8,598 and in June 7,888. The equivalent monthly birth-rate was 20·8 in April, 20·7 in May and 19·7 in June. In the previous year the birth-rate in April was 20·7, in May 20·4 and in June 18·8.

The quarterly birth-rate in England and Wales was 17·2 and in Northern Ireland 22·5, the former being 3·2 below, but the latter being 2·1 above, the rate for Scotland.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 8,283. This number is 985 more than in the previous quarter and 158 more than in the second quarter of last year; it is 349 more than the mean of the numbers for the second quarters for the preceding five years, but is 377 less than the mean of those for the second quarters of the preceding ten years.

The quarterly marriage-rate was 6·8 per thousand. It is 0·7 above that for the previous quarter and 0·1 above that for the second quarter of last year. It is 0·3 above the mean of the rates for the second quarters of the preceding five years, but 0·3 below the mean of those for the second quarters of the preceding ten years.

In the counties, burghs included, the quarterly marriage-rate ranged from 8·1 in Aberdeen, in Midlothian and in Wigtown and 7·9 in Roxburgh, to 2·7 in Shetland and in Sutherland, 3·2 in Ross and Cromarty and 3·6 in Bute.

In the larger burghs taken collectively the quarterly marriage-rate was 8·0 per thousand, in the smaller burghs 6·9, and in the county districts 4·9. In the previous quarter these three rates were 7·1, 6·3 and 4·2 respectively, while in the second quarter of last year they were 7·9, 6·5 and 4·7.

In the larger burghs taken individually the marriage-rate ranged from 10·9 in Perth, 8·8 in Aberdeen, 8·7 in Dundee, 8·6 in Glasgow and 8·4 in Edinburgh, to 4·4 in Hamilton, 4·5 in Motherwell and Wishaw, 5·4 in Coatbridge, 5·7 in Kirkcaldy and 5·8 in Paisley.

In burghs with populations of between 10,000 and 30,000 this rate ranged from 13·1 in Inverness, 9·8 in Rutherglen, 9·6 in Dumfries and 9·4 in Montrose, to 3·1 in Gourock, 3·6 in Fraserburgh, 4·0 in Kirkin-tilloch and 4·1 in Barrhead.

In county districts with populations of over 10,000 the quarterly marriage-rate ranged from 9·4 in Annan District of Dumfries, 8·6 in Rhins District of Wigtown, 7·3 in Laeswade District of Midlothian and 7·0 in Deer District of Aberdeen, to 1·2 in Skye District of Inverness, 1·6 in Mainland District of Shetland, 1·8 in Forfar District of Forfar (Angus), and 2·3 in Lower District of Renfrew and in Lewis District of Ross and Cromarty.

Marriages registered in April numbered 3,210, in May 1,108 and in June 3,965. The equivalent monthly marriage-rate was 8·0 in April, 2·7 in May and 9·9 in June. Last year the marriage-rate in April was 8·4, in May 2·6 and in June 9·0.

DEATHS.*

Deaths registered in Scotland during the second quarter of the year 1930 numbered 15,886. They are 3,166 fewer than the previous quarter, and 9 fewer than in the second quarter of last year. They numbered 352 fewer than the mean of the numbers for the second quarters of the preceding five years, and 866 fewer than the mean of those for the second quarters of the preceding ten years.

The quarterly Scottish death-rate was 13·1 per thousand, being 2·7 less than in the previous quarter, but 0·1 more than in the second quarter of last year. It is 0·2 below the mean of the rates for the second quarters of the preceding five years, and 0·6 below the mean of those for the second quarters of the preceding ten years.

In the divisions of the counties the death-rate ranged from 15·2 in the North-Western division, 14·5 in the Southern and 14·4 in the Northern, to 11·9 in the West-Midland and 12·9 in the South-Western. In the South-Eastern it was 13·3, and in the North-Eastern and the East-Midland it was 13·0.

In the counties, burghs included, the death-rate ranged from 17·6 in Roxburgh, 16·4 in Sutherland, 15·9 in Forfar (Angus) and 15·8 in Inverness, to 9·2 in Nairn, 10·4 in Kinross and in West Lothian and 10·6 in Fife.

In the larger burghs taken collectively the death-rate was 13·9, in the smaller burghs 13·2, and in the county districts 11·7. In the previous quarter these three rates were 16·9, 16·0 and 14·1 respectively; in the second quarter of last year they were 13·3, 13·4 and 12·3.

In the larger burghs taken individually this rate ranged from 17·3 in Dundee, 14·5 in Edinburgh, 14·1 in Kilmarnock, and 14·0 in Glasgow and in Greenock, to 10·7 in Clydebank and in Kirkcaldy, 11·1 in Perth, 11·4 in Hamilton and 11·6 in Motherwell and Wishaw.

In burghs with populations of between 10,000 and 30,000 this rate ranged from 19·9 in Inverness, 18·7 in Hawick and 15·2 in Montrose, to 8·0 in Renfrew, 8·3 in Cowdenbeath, 8·8 in Buckhaven and Methil and 8·8 in Dumbarton.

In county districts with populations of over 10,000 the death-rate ranged from 20·2 in Skye District of Inverness, 18·1 in Keith District of Banff, and

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

17·0 in County District of Sutherland, to 7·4 in Dunfermline District of Fife, 8·1 in Carrick District of Ayr, 9·0 in Bathgate District of West Lothian, and 9·1 in Highland District of Perth.

Deaths registered in April numbered 5,769, in May 5,454, and in June 4,663. The monthly death-rate in April was 14·4, in May 13·2, and in June 11·6. In the previous year these three death-rates were 14·3, 13·4 and 11·4 respectively.

The quarterly death-rate in England and Wales was 11·3 per thousand and in Northern Ireland 13·8, the former being 1·8 below but the latter 0·7 above the corresponding rate in Scotland.

AGES OF THOSE DYING.

Of the 15,886 persons whose deaths were registered during the quarter 2,836 or 17·9 per cent. were children of less than five years old, 6,538 or 41·2 per cent. were persons aged five to sixty-four, and 6,508 or 40·9 per cent. were persons aged sixty-five and over, while four were of unstated age. Compared with the number in the corresponding quarter of last year, deaths of children of less than five years old are 176 more, those of persons aged five to sixty-four are 158 fewer, and those of persons aged sixty-five and over are 30 fewer.

Deaths of children of less than one year old numbered 1,822, and as the births registered during the quarter numbered 24,816, these deaths equal an infantile mortality rate of 73 per thousand registered births. These deaths number 776 fewer than in the previous quarter, and 21 fewer than in the second quarter of last year. They number 240 fewer than the mean of the numbers for the second quarters of the preceding five years and 601 fewer than the mean of those for the second quarters of the preceding ten years. The infantile mortality rate for the quarter is 37 less than in the previous quarter and 3 less than in the second quarter of last year. It is 6 less than the mean of the rates for the second quarters of the preceding five years, and 11 less than the mean of those for the corresponding quarters of the preceding ten years. This rate is the lowest for any second quarter since 1913, the earliest year for which quarterly infantile mortality rates for Scotland are available.

In the divisions of the counties the infantile mortality rate ranged from 79 in the South-Eastern, 78 in the North-Western and 77 in the South-Western, to 38 in the Northern and 66 in the West-Midland. In the East-Midland it was 69 and in the North-Eastern and the Southern Divisions it was 67.

In the counties, burghs included, this rate ranged from 161 in Kinross, 125 in Roxburgh, 105 in Shetland and 102 in Forfar (Angus), to 0 in Nairn and in Sutherland, 18 in Bute, and 32 in Caithness and in Orkney.

In the larger burghs taken collectively this rate was 83, in the smaller burghs 69 and in the county districts 59. In the previous quarter these three rates were 120, 101 and 97 respectively. In the second quarter of last year they were 83, 69 and 67.

In the larger burghs taken individually this rate ranged from 122 in Dundee, 96 in Greenock, 94 in Clydebank and 90 in Kilmarnock, to 28 in Dunfermline, 38 in Kirkcaldy, 48 in Ayr and 57 in Perth. In Glasgow this rate was 84, in Edinburgh 83 and in Aberdeen 71.

In England and Wales the quarterly infantile mortality rate was 57 per thousand registered births, while in Northern Ireland it was 64, the former being 16 less than the Scottish rate and the latter 9 less.

CAUSES OF DEATH.

Of the 15,886 deaths registered during the quarter, 819, or 5·2 per cent., were attributed to the principal epidemic diseases. These 819 deaths included 6 from enteric fever, 332 from measles, 28 from scarlet fever, 236 from whooping-cough, 92 from diphtheria, and 125 from the diarrhœas of childhood. Compared with the number in the previous quarter, deaths from whooping-cough are 58 more and from enteric fever 2 more, but those from the diarrhœas of childhood are 3 fewer, from scarlet fever 16 fewer, from measles 23 fewer and from diphtheria 65 fewer. Compared with the number for the second quarter of last year, deaths from measles are 321 more, from scarlet fever 3 more and from enteric fever 2 more, but those from whooping-cough are 5 fewer, from diphtheria 9 fewer and from diarrhœa 18 fewer.

The principal epidemic diseases death-rate for the quarter was 0·7 per thousand, being the same as in the previous quarter, but 0·3 more than in the second quarter of last year. The quarterly death-rate from measles was 27 per 100,000, from whooping-cough 19, from the diarrhœas of childhood 10, from diphtheria 8, and from scarlet fever 2.

In the counties, burghs included, this death-rate ranged from 1·3 in Renfrew, 1·2 in Midlothian and 1·0 in East Lothian and in Forfar (Angus), to 0 in Bute, in Kinross, in Nairn, in Orkney and in Selkirk.

In the larger burghs this death-rate ranged from 1·7 in Greenock, 1·6 in Dundee, 1·6 in Paisley and 1·4 in Edinburgh, to 0 in Kirkcaldy and in Perth and 0·3 in Aberdeen and in Falkirk. In Glasgow this rate was 0·8.

Deaths from epidemic diseases other than those grouped as the principal epidemic diseases included 5 from paratyphoid fever, 1 from typhus fever (registered in Glasgow), 51 from erysipelas, 5 from acute poliomyelitis, 24 from encephalitis lethargica and 72 from cerebro-spinal meningitis. Compared with the numbers for the previous quarter deaths from paratyphoid fever are 3 more, from erysipelas 17 fewer, from acute poliomyelitis 1 fewer, from encephalitis lethargica 12 fewer and from cerebro-spinal meningitis 9 more. The death registered from typhus fever is the first which has occurred in Scotland since September 1927.

Deaths from influenza in all numbered 166, of which 25 were attributed to influenza as the sole cause and 141 to influenza along with some contributory cause. In the previous quarter the total deaths from influenza numbered 287, of which 37 were attributed to influenza as the sole cause.

Deaths from all forms of tuberculosis numbered 1,216, constituted 7·7 per cent. of the total deaths for the quarter, and equalled a death-rate of 100 per 100,000. These deaths numbered 58 more than in the previous quarter, but 30 fewer than in the second quarter of last year. This death-rate is 4 more than in the previous quarter, but 2 less than in the second quarter of last year. Of these deaths 828 were ascribed to

tuberculosis of the respiratory system, 162 to tuberculous meningitis, 93 to abdominal tuberculosis and 133 to tuberculosis of other organs. Compared with the numbers of the previous quarter deaths from tuberculosis of the respiratory system are 27 more, from tuberculous meningitis 5 more and from abdominal tuberculosis 26 more, while those from other forms of tuberculosis number the same. The quarterly death-rate from tuberculosis of the respiratory system was 68 per 100,000, which is 1 more than in the previous quarter, but 2 less than in the second quarter of last year.

Deaths from malignant disease numbered 1,679, constituted 10·6 per cent. of the total deaths for the quarter, and equalled a death-rate of 138 per 100,000. These deaths number 71 fewer than in the previous quarter and 66 fewer than in the second quarter of last year.

Deaths from pneumonia, exclusive of those specifically associated with influenza but including those attributed to broncho-pneumonia, numbered 1,374, constituted 8·6 per cent. of the total deaths for the quarter, and equalled a death-rate of 113 per 100,000. These deaths number 721 fewer than in the previous quarter and 7 fewer than in the second quarter of last year.

Deaths from bronchitis, exclusive of those associated with influenza, numbered 817, constituted 5·1 per cent. of the total deaths for the quarter and equalled a death-rate of 67 per 100,000. They number 716 fewer than in the previous quarter, but 49 more than in the second quarter of last year.

Deaths from violence numbered 748, constituted 4·7 per cent. of the total deaths, and equalled a death-rate of 61 per 100,000. These deaths number 56 fewer than in the previous quarter, but 16 more than in the second quarter of last year. Deaths attributed to accidents with motor vehicles numbered 163, being 11 more than in the previous quarter and 18 more than in the second quarter of last year. Deaths attributed to suicide numbered 130, being 12 more than in the previous quarter and 1 more than in the second quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 156, which is 38 less than in the previous quarter, but 1 more than in the second quarter of last year. These deaths equal a death-rate of 6·3 per thousand registered births, which is 1·9 less than in the previous quarter and 0·1 less than in the second quarter of last year.

Deaths from ill-defined causes numbered 197, and those of which the cause was either not specified or merely described as "natural causes" numbered 41. In the previous quarter deaths from ill-defined causes numbered 199 and those from unspecified causes 83. In the second quarter of last year these two numbers were 178 and 46 respectively.

TABLE A.—BIRTH-, DEATH-, AND MARRIAGE-RATES OF THE COUNTIES OF SCOTLAND
DURING THE QUARTER ENDING 30TH JUNE 1930.

COUNTIES.	Population estimated to middle of 1930.	Rates per 1000 of Estimated Population.				Illegiti- mate Births per cent. of Total Births.	Infantile Mor- tality Rate per 1000 Births.

REPORT

REPORT OF THE BIRTHS, DEATHS AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH SEPTEMBER 1930.

THE more outstanding features of the vital statistics of Scotland for the third quarter of the year are a birth-rate of 18·7 per thousand, a marriage-rate of 7·7, a death-rate of 10·9, and an infantile mortality rate of 59 per thousand registered births.

The quarterly birth-rate is 1·7 below that of the previous quarter and 0·8 below the mean of the rates for the corresponding quarters of the last five years.

The marriage-rate for the quarter, 7·7 per thousand, is 0·9 above that for the previous quarter and 0·3 above the mean of the rates for the third quarters of the preceding five years.

The death-rate for the quarter, 10·9 per thousand, is 2·2 below that for the previous quarter, but shows little difference from the mean of those for the third quarters of recent years.

The illegitimate births registered during the quarter numbered 1,730 and are 115 fewer than in the previous quarter. They equal a rate of 7·5 per cent. of the total births, which is 0·1 more than in the previous quarter, but 0·3 less than in the third quarter of last year.

Deaths of children aged under one year numbered 1,358, being equal to an infantile mortality rate of 59 per thousand registered births. This rate is the lowest yet recorded for any quarter for which such rates for Scotland are available, that is, since 1913.

Deaths from measles, which in the previous quarter numbered 332, numbered 66 in the third quarter. Two deaths from smallpox occurred during the quarter, these being the first deaths registered in Scotland as due to smallpox since 1921.

The death-rates per 100,000 from all forms of tuberculosis and from tuberculosis of the respiratory system were 76 and 54 respectively. The former is the lowest quarterly death-rate from tuberculosis yet recorded in Scotland, while the latter is equal to the lowest previously recorded.

Deaths from malignant disease numbered 1,877 and equalled a death-rate of 153 per 100,000, being the highest rate hitherto recorded in Scotland for any quarter. The deaths numbered 198 more than in the previous quarter and 70 more than in the third quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 154 and equalled a mortality rate of 6·7 per thousand births. This rate, while 0·4 more than in the previous quarter, is the same as in the third quarter of last year.

Deaths from violence numbered 794, being 46 more than in the previous quarter and 45 more than in the corresponding quarter of last year. Of these deaths 233 were attributed to accidents with motor vehicles, being 22 more than in the third quarter of last year.

TABLE I.—BIRTHS, ILLEGITIMATE BIRTHS, DEATHS, and MARRIAGES in SCOTLAND, and in the Divisions of the Counties during the Quarter ending 30th September 1930, with relative rates ; also Infantile Mortality.

BIRTHS.

The births of 22,951 living children were registered during the third quarter of the year 1930. This number is 1,865 less than in the previous quarter, 1,130 less than the mean of the numbers for the third quarters of the preceding five years, and 3,389 less than the mean of those for the third quarters of the preceding ten years. It is the smallest number of births registered in Scotland in the third quarter of any year.

The Scottish birth-rate for the quarter was 18·7 per thousand. This rate is 1·7 below that for the previous quarter, 0·8 below the mean of the rates for the corresponding quarters of the last five years, and 2·7 below the mean of those for the third quarters of the preceding ten years.

Of the 22,951 children whose births were registered during the quarter, 11,602 were males and 11,349 were females, the ratio of males to females being 102·2 to 100. In the first quarter of this year this ratio was 103·1 to 100 and in the second quarter of this year it was 103·9 to 100. The ratio for the third quarter is the lowest observed for many years past.

In the divisions of the counties the quarterly birth-rate ranged from 20·1 in the North-Eastern and 19·9 in the South-Western, to 14·7 in the Northern and 16·3 in the North-Western. In the Southern it was 18·6, in the South-Eastern 17·4, in the East-Midland 17·3 and in the West-Midland 16·5.

In the counties, burghs included, the quarterly birth-rate ranged from 21·6 in Kirkcudbright, 21·3 in Moray and 20·4 in Aberdeen, in Dumfries and in Lanark, to 10·3 in Bute, 12·0 in Peebles, 12·5 in Nairn and 13·3 in Orkney.

In the larger burghs taken collectively the quarterly birth-rate was 19·6 per thousand, in the smaller burghs 17·5 and in the county districts 17·9. In the previous quarter these three rates were 21·4, 19·5 and 19·3 respectively, while in the corresponding quarter of last year they were 19·5, 17·3 and 18·3 respectively.

In burghs with populations of over 30,000 the quarterly birth-rate ranged from 24·6 in Coatbridge, 22·0 in Greenock, and 21·7 in Aberdeen and in Hamilton, to 15·9 in Kirkcaldy, 16·1 in Dunfermline, and 16·4 in Edinburgh and in Perth. In Glasgow and in Dundee this rate was 20·5.

In burghs with populations of between 10,000 and 30,000 the quarterly birth-rate ranged from 25·2 in Barrhead, 23·6 in Inverness, 22·9 in Port-Glasgow and 22·6 in Johnstone, to 12·0 in Hawick, 13·7 in Gourock, 14·3 in Montrose and 15·1 in Galashiels.

In county districts with populations of over 10,000 the quarterly birth-rate ranged from 24·3 in Ayr District of Ayr, 23·8 in Banff District of Banff, 23·4 in Ellon District of Aberdeen and 22·9 in Lasswade District of Midlothian, to 9·6 in Highland District of Perth, 10·4 in Western District of Stirling, 11·5 in Mainland District of Shetland, 12·2 in Upper District of Renfrew and 12·9 in Lower District of Renfrew.

Of the 22,951 births registered during the quarter, 21,221 or 92·5 per cent. were legitimate, while 1,730 or 7·5 per cent. were illegitimate. Compared with the numbers in the previous quarter legitimate children are 1,750 fewer and illegitimate children 115 fewer. Compared with the numbers in the third quarter of last year legitimate children are 26 fewer and illegitimate children 72 fewer. The illegitimate rate for the quarter, 7·5 per cent., is 0·1 more than in the previous quarter, but 0·3 less than in the third quarter of last year. The number of illegitimate births registered in this quarter is 46 less than the mean of the numbers for the third quarters of the preceding five years and 179 less than the mean of those for the third quarters of the preceding ten years.

In the divisions of the counties the illegitimate rate ranged from 12·1 in the South-Eastern, 11·9 in the Northern and 11·6 in the Southern, to 6·3 in the South-Western and 7·0 in the South-Eastern. In the North-Western it was 8·2, in the East-Midland 7·5 and in the West-Midland 7·4.

In the counties, burghs included, the illegitimate rate ranged from 19·1 in Wigtown, 17·8 in Banff, 17·5 in Caithness and 16·0 in Moray, to 3·7 in Kinross, 3·8 in Nairn, 5·4 in Roxburgh and 5·6 in Renfrew.

In the larger burghs taken collectively the illegitimate rate was 6·5 per cent., in the smaller burghs 7·7 per cent., and in the county districts 9·3 per cent. In the previous quarter these three rates were 6·5, 7·5 and 9·0 respectively, while in the third quarter of last year they were 6·6, 7·7 and 10·0 respectively.

In the larger burghs taken individually the illegitimate rate ranged from 9·8 in Perth, 7·7 in Aberdeen and 7·5 in Paisley, to 3·6 in Kilmarnock, 4·5 in Hamilton and 4·9 in Clydebank.

In burghs with populations of between 10,000 and 30,000 the illegitimate rate ranged from 12·7 in Stirling, 10·6 in Galashiels and 10·5 in Fraserburgh, to 0 in Gourock and in Saltcoats, 1·4 in Renfrew and 1·9 in Rutherglen.

In county districts with populations of over 10,000 this rate ranged from 25·5 in Rhins District of Wigtown, 22·2 in the County District of Caithness, 21·4 in Turriff District of Aberdeen and 20·7 in Garioch District of Aberdeen, to 4·1 in Northern District of Ayr, 4·5 in Mainland District of Shetland, 4·7 in Upper District of Renfrew and 5·0 in Skye District of Inverness.

Births registered in Scotland in July numbered 7,884, in August 7,629 and in September 7,438. The equivalent monthly birth-rate was 19·0 in July, 18·4 in August and 18·5 in September. In the previous year the corresponding birth-rates were 19·6, 18·6 and 17·8 respectively.

The quarterly birth-rate for England and Wales was 16·6 per thousand and in Northern Ireland 20·9, the former being 2·1 below the rate for Scotland but the latter 2·2 above.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 9,532. This number is 1,249 more than in the previous quarter and 416 more than the mean of the numbers for the third quarters of the preceding five years, but is 113 less than the mean of the numbers for the third quarters of the preceding ten years.

The quarterly marriage-rate was 7·7 per thousand. It is 0·9 above that for the previous quarter and 0·3 above the mean of the rates for the third quarters of the preceding five years, but is 0·1 below the mean of those for the third quarters of the preceding ten years.

In the counties, burghs included, the quarterly marriage-rate ranged from 9·9 in Midlothian, 9·0 in Aberdeen, 8·9 in Lanark and 8·5 in Angus, to 2·3 in Ross and Cromarty, 3·3 in Bute, 3·4 in Argyll and 3·5 in Shetland.

In the larger burghs taken collectively the quarterly marriage-rate was 9·8 per thousand, in the smaller burghs 7·6 and in the county districts 4·6. In the previous quarter these three rates were 8·0, 6·9 and 4·9 respectively, while in the third quarter of last year they were 10·0, 7·3 and 4·8 respectively.

In the larger burghs taken individually this rate ranged from 12·2 in Perth, 12·0 in Aberdeen, 10·6 in Edinburgh, 10·3 in Falkirk and 10·2 in Glasgow, to 6·1 in Motherwell and Wishaw, 6·4 in Coatbridge and 6·5 in Greenock.

In burghs with populations of between 10,000 and 30,000 this rate ranged from 13·7 in Inverness, 10·6 in Fraserburgh, 10·4 in Bo'ness and 10·2 in Musselburgh, to 3·8 in Barrhead, 4·4 in Gourock, 4·8 in Johnstone and 5·3 in Dumbarton.

In county districts with populations of over 10,000 the quarterly marriage-rate ranged from 10·8 in Annan District of Dumfries, 7·1 in Thornhill District of Dumfries, 7·1 in Cupar District of Fife and 7·0 in Dunfermline District of Fife, to 0·9 in Lewis District of Ross and Cromarty, 1·4 in Mid-Ross District of Ross and Cromarty and 1·5 in Skye District of Inverness.

Marriages registered in July numbered 3,934, in August 2,348 and in September 3,250. The equivalent marriage-rate was 9·5 in July, 5·7 in August and 8·1 in September. Last year the marriage-rate in July was 10·5, in August 5·6 and in September 7·5.

DEATHS.*

Deaths registered in Scotland during the third quarter of the year numbered 13,353. They are 2,533 fewer than the mean of the numbers for the third quarters of the preceding five years and 114 fewer than the mean of those for the third quarters of the preceding ten years.

The quarterly Scottish death-rate was 10·9 per thousand, being 2·2 below that for the previous quarter and 0·1 below the mean of those for the third quarters of the preceding ten years, but 0·1 above the mean of those for the third quarters of the preceding five years.

In the divisions of the counties the death-rate ranged from 13·1 in the Northern and 12·6 in the North-Western, to 9·7 in the West-Midland and 10·5 in the South-Western. In the Southern it was 12·2, in the South-Eastern 11·4, in the North-Eastern 11·2 and in the East-Midland 10·9.

In the counties, burghs included, the death-rate ranged from 17·8 in Nairn, 17·2 in Sutherland, 14·9 in Orkney and 14·7 in Selkirk, to 8·2 in Stirling, 9·0 in West Lothian, 9·5 in Dumbarton and 9·6 in Fife.

In the larger burghs taken collectively the death-rate was 11·1, in the smaller burghs 11·3 and in the county districts 10·3. In the previous quarter these three rates were 13·9, 13·2 and 11·7 respectively, while in the third quarter of last year they were 11·1, 10·9 and 10·2 respectively.

In the larger burghs taken individually the quarterly death-rate ranged from 12·9 in Dundee, 11·8 in Greenock, 11·7 in Edinburgh and 11·5 in Perth, to 7·7 in Clydebank, 8·3 in Falkirk, 8·7 in Hamilton and 8·8 in Motherwell and Wishaw.

In burghs with populations of between 10,000 and 30,000 this rate ranged from 14·8 in Galashiels, 14·6 in Dumfries, 13·1 in Inverness and 12·7 in Montrose, to 6·2 in Saltcoats, 6·3 in Cowdenbeath, 6·7 in Fraserburgh and 7·7 in Renfrew.

In county districts with populations of over 10,000 the death-rate ranged from 16·9 in Cupar District of Fife, 16·8 in County District of Sutherland, 16·0 in Mid-Ross District of Ross and Cromarty and 15·4

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

in Skye District of Inverness, to 5·0 in Brechin District of Angus, 6·3 in Linlithgow District of West Lothian, 6·5 in Eastern District of Stirling and 7·0 in Dunfermline District of Fife.

Of the 13,353 persons whose deaths were registered during the quarter, 6,839 were of males and 6,514 were of females; the male death-rate being 11·6 per thousand and the female death-rate 10·2 per thousand. In the third quarter of last year these two death-rates were 11·2 and 10·3 respectively.

Deaths registered in July numbered 4,665, in August 4,283 and in September 4,405. The monthly death-rate in July was 11·3, in August 10·3 and in September 11·0. Last year these three death-rates were 11·4, 10·5 and 10·3 respectively.

The quarterly death-rate in England and Wales was 9·7 per thousand and in Northern Ireland 11·2 per thousand, the former being 1·2 below the corresponding rate for Scotland but the latter 0·3 above.

AGES OF THOSE DYING.

Of the 13,353 persons whose deaths were registered during the quarter, 1,941 or 14·5 per cent. were children aged under five years, 5,929 or 44·4 per cent. were persons aged 5 to 64, while 5,483 or 41·1 per cent. were persons aged 65 and over. Compared with the numbers in the corresponding quarter of last year deaths of children under five years are 20 fewer, but those of persons aged 5 to 64 are 61 more and those of persons aged 65 and over are 29 more.

Deaths of children of less than one year old numbered 1,358, and as the births registered during the quarter numbered 22,951, these deaths equal an infantile mortality rate of 59 per thousand registered births. These deaths numbered 464 fewer than in the previous quarter and 80 fewer than in the third quarter of last year. The infantile mortality rate of the quarter is 14 below that for the previous quarter, 8 below the mean of the rates for the corresponding quarters of the preceding five years, and 10 below the mean of those for the corresponding quarters of the preceding ten years. It is the lowest infantile mortality rate yet recorded for any quarter in Scotland since 1913, which is the earliest year for which quarterly infantile mortality rates are available. The previous lowest quarterly infantile mortality rates recorded were 62 in the third quarter of 1923 and in the third quarter of 1929.

In the divisions of the counties the infantile mortality rate ranged from 66 in the South-Western and 60 in the South-Eastern, to 45 in the Southern and 46 in the Northern and in the West-Midland Divisions. In the East-Midland it was 56, in the North-Western 52 and in the North-Eastern 47.

In the counties, burghs included, this rate ranged from 100 in Sutherland, 76 in Wigtown, 74 in Renfrew, and 67 in Berwick and in Lanark, to 0 in Peebles, 19 in Kirkcudbright, 20 in Bute, 26 in Caithness and 27 in Orkney.

In the larger burghs taken collectively this rate was 64, in the smaller burghs 53 and in the county districts 54. In the previous

quarter these three rates were 83, 69 and 59 respectively, while in the third quarter of last year they were 70, 57 and 52 respectively.

In the larger burghs taken individually this rate ranged from 90 in Hamilton, 82 in Paisley, 77 in Kilmarnock, and 73 in Dundee and in Greenock, to 13 in Falkirk, 23 in Ayr and 27 in Clydebank.

The infantile mortality rate for the quarter in England and Wales was 45 and in Northern Ireland 54, the former being 14 lower than the Scottish rate and the latter 5 lower.

CAUSES OF DEATH.

Of the 13,353 deaths registered during the quarter 453 or 3·4 per cent. were attributed to the principal epidemic diseases. These deaths included 8 from enteric fever, 66 from measles, 26 from scarlet fever, 93 from whooping-cough, 72 from diphtheria and 188 from the diarrhœas of childhood. Compared with the numbers in the previous quarter deaths from the diarrhœas of childhood are 63 more and those from enteric fever are 2 more, but those from scarlet fever are 2 fewer, from diphtheria 20 fewer, from whooping-cough 143 fewer and from measles 266 fewer. Compared with the numbers for the third quarter of last year deaths from measles are 38 more, from scarlet fever 16 more and from enteric fever 5 more, while those from diphtheria are 6 fewer, from whooping-cough 9 fewer and from the diarrhœas of childhood 39 fewer.

The principal epidemic diseases death-rate of the quarter was 37 per 100,000, being 30 less than in the previous quarter but 1 more than in the third quarter of last year. The quarterly death-rate from the diarrhœas of childhood was 15 per 100,000, from whooping-cough 8, from diphtheria 6, from measles 5, from scarlet fever 2 and from enteric fever 1.

In the counties, burghs included, this rate ranged from 0·6 per thousand in Midlothian, in Renfrew and in West Lothian, and 0·5 in Kinross and in Lanark, to 0 in eight counties.

In the larger burghs this death-rate ranged from 1·0 in Greenock, 0·7 in Coatbridge, 0·6 in Edinburgh and in Kilmarnock and 0·5 in Glasgow, to 0·1 in Aberdeen, in Kirkcaldy, in Falkirk and in Perth.

Deaths from epidemic diseases other than those grouped as the principal epidemic diseases included 8 from paratyphoid fever, 2 from smallpox, 33 from erysipelas, 7 from acute poliomyelitis (infantile paralysis), 34 from encephalitis lethargica and 43 from cerebro-spinal meningitis. The 2 deaths from smallpox, both of which occurred in Aberdeen County, are the first deaths from smallpox registered in Scotland since the year 1921. Compared with the numbers for the previous quarter deaths from paratyphoid fever are 3 more, from erysipelas 18 fewer, from acute poliomyelitis 2 more, from encephalitis lethargica 10 more and from cerebro-spinal meningitis 29 fewer.

Deaths from influenza in all numbered 73, of which 11 were attributed to influenza as the sole cause and 62 to influenza along with some contributory cause. In the previous quarter the total number was 166, of which 25 were attributed to influenza as the sole cause.

Deaths from all forms of tuberculosis numbered 939, constituted 7·0 per cent. of the total deaths, and equalled a death-rate of 76 per 100,000. These deaths numbered 277 fewer than in the previous quarter and 18 fewer than in the third quarter of last year. This death-rate is 24 less than in the previous quarter, 2 less than that for the third quarter of last year, and is the lowest quarterly death-rate from tuberculosis so far recorded in Scotland. Of these deaths 664 were ascribed to tuberculosis of the respiratory system, 125 to tuberculous meningitis, 57 to abdominal tuberculosis and 93 to other forms of tuberculosis. Compared with the numbers for the previous quarter, deaths from tuberculous meningitis are 37 fewer, from abdominal tuberculosis 36 fewer and from other forms of tuberculosis 40 fewer. The quarterly death-rate from tuberculosis of the respiratory system was 54 per 100,000, being 14 less than in the previous quarter but the same as that for the third quarter of last year, which was the lowest rate from this cause previously recorded in Scotland for any quarter.

Deaths from malignant disease numbered 1,877, constituted 14·1 per cent. of the total deaths for the quarter, and equalled a death-rate of 153 per 100,000. These deaths are 198 more than in the previous quarter and 70 more than in the third quarter of last year, while the rate is the highest yet recorded for any quarter.

Deaths from pneumonia, exclusive of those specifically associated with influenza but including those attributed to broncho-pneumonia, numbered 748, constituted 5·6 per cent. of the total deaths of the quarter, and equalled a death-rate of 61 per 100,000. These deaths numbered 626 fewer than in the previous quarter and 25 fewer than in the third quarter of last year.

Deaths from bronchitis, exclusive of those associated with influenza, numbered 451, constituted 3·4 per cent. of the total deaths for the quarter, and equalled a death-rate of 37 per 100,000. They numbered 366 fewer than in the previous quarter but 28 more than in the corresponding quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 154, being 2 fewer than in the previous quarter but the same as in the third quarter of last year. These deaths equalled a death-rate of 6·7 per thousand registered births, which is 0·4 more than in the previous quarter but the same as in the third quarter of last year.

Deaths from violence numbered 794, constituted 5·9 per cent. of the total deaths for the quarter, and equalled a death-rate of 65 per 100,000. Deaths attributed to accidents with motor vehicles numbered 233, being 70 more than in the previous quarter and 22 more than in the third quarter of last year. Deaths attributed to suicide numbered 145, being 15 more than in the previous quarter and 20 more than in the third quarter of last year.

Deaths from ill-defined causes numbered 179, and those of which the cause was either not specified or merely described as “natural causes” numbered 41. In the previous quarter deaths from ill-defined causes numbered 197 and those from unspecified causes 41. In the third quarter of last year they numbered 181 and 39 respectively.

TABLE A.—BIRTH-, DEATH-, AND MARRIAGE-RATES OF THE COUNTIES OF SCOTLAND
DURING THE QUARTER ENDING 30TH SEPTEMBER 1930.

COUNTIES.	Population estimated to middle of 1930.	Rates per 1000 of Estimated Population.				Illegiti- mate Births per cent. of Total Births.	Infantile Mor- tality Rate per 1000 Births.
		Births.	Mar- riages.	Deaths.	Deaths from Principal Epidemic Diseases.		
SCOTLAND	4,879,700	18·7	7·7	10·9	0·4	7·5	59

REPORT

THIS Report deals more especially with the statistics of the fourth quarter of the year 1930, but as figures relative to the entire year are now available, a short preliminary statement of them is included. A full report of the vital statistics of the year will in due course be published in the Seventy-sixth Annual Report. The annual figures here given may be accepted as substantially correct, but they are provisional, and will be superseded by those appearing in the Annual Report referred to above.

The more outstanding features of the vital statistics of the year are a birth-rate which is slightly higher than that of last year, but still lower than those of recent years, a marriage-rate which remains the same as that of the previous year, and a death-rate which is lower than in the previous year and lower than the average of recent years. The birth-rate was 19·3 per 1,000, which is 0·3 more than that of the previous year, but 0·9 less than that of the preceding five years and 2·9 less than that of the preceding ten years. The marriage-rate was 6·8 per 1,000, which is the same as that for the previous year, and 0·2 more than the average of the preceding five years. The death-rate was 13·2, which is 1·3 below the rate for 1929, 0·3 lower than the average of the preceding five years, and 0·6 lower than that for the preceding ten years.

The infantile mortality rate of the year was 83 per 1,000 births, which is 4 less than that of the previous year and 7 less than the average of the preceding ten years.

The death-rates from all forms of tuberculosis and from respiratory tuberculosis are both lower than in 1929 and are the lowest yet recorded. The former was 88 per 100,000 and is for the first time below 90 per 100,000. It is 6 less than that for the previous year and is 22 below the average of the past ten years. The rate from respiratory tuberculosis was 62 per 100,000, which is 5 less than in the previous year and 14 less than the average of the past ten years.

Deaths from malignant disease numbered 7,120 and constitute the largest number so far recorded. They are 271 more than the mean of those registered during the preceding five years and 622 more than the mean of those of the preceding ten years.

The death-rate from the principal epidemic diseases was 54 per 100,000, which is 6 more than that of the previous year.

The quarterly statistics included in the report, those for the fourth quarter of the year 1930, show a birth-rate of 18·8, a marriage-rate of 6·7, and a death-rate of 13·0 per 1,000. The quarterly birth-rate is 0·1 more than that for the previous quarter, but 0·4 below the mean of those for the fourth quarters of the preceding five years. The marriage-rate is 1·0 below that for the previous quarter, but 0·2 above the mean of those for the corresponding quarters of the preceding five years. The

death-rate is 2·1 above that for the previous quarter, but 0·3 below the mean of the rates in the corresponding quarters of the preceding five years.

PRELIMINARY STATEMENT REGARDING THE VITAL STATISTICS OF SCOTLAND DURING THE YEAR 1930.

Births registered in Scotland during the year 1930 numbered 94,538. They are 1,658 more than in the previous year, but 4,054 fewer than the mean of those registered during the previous five years and 14,121 fewer than the mean of those registered during the previous ten years.

The Scottish birth-rate of the year was 19·3 per thousand, which rate is 0·3 more than that of the previous year, but 0·9 less than the mean of the rates of the previous five years, and 2·9 less than the mean of the rates of the previous ten years. Though slightly higher than that for the previous year, the birth-rate continues to be markedly lower than those of recent years. During the period of the Great War the number of births registered in Scotland fell to 97,441 and the birth-rate to 20·3, but both the number of births and the birth-rate of 1930 are of less amount, the number being 2,903 less and the rate 1·0 less. After the War the birth-rate rose to 28·1 in 1920, but since then it has steadily fallen, being below 24 in 1922, below 22 in 1924, and below 20 during the last four years 1927-30.

Of the 94,538 children whose births were registered during the year, 87,592 or 92·7 per cent. were legitimate, while 6,946 or 7·3 per cent. were illegitimate. The legitimate children of the year numbered 1,877 more than in 1929, but the illegitimate children numbered 219 fewer.

Marriages registered during the year numbered 33,323 and equalled a marriage-rate of 6·8 per thousand. This number is 324 more than that for the previous year, but the rate is the same as in that year. The number of marriages registered is 883 more than the mean of those registered during the previous five years, but 1,687 fewer than the mean of those of the previous ten years. The marriage-rate is 0·2 more than the mean of the preceding five years, but 0·4 less than the mean of the preceding ten years. During recent years the marriage-rate has shown a slight upward tendency, being 6·4 in 1926, 6·7 in 1927 and 1928, and 6·8 in 1929 and 1930.

Deaths registered during the year numbered 64,283. This number is 6,634 fewer than in the previous year, 1,978 fewer than the mean of those registered during the preceding five years, and 2,941 fewer than the mean of those registered during the preceding ten years.

The annual death-rate was 13·2 per thousand, and is 1·3 less than that of the previous year, 0·3 less than the mean of those for the preceding five years, and 0·6 less than the mean of those for the preceding ten years. The death-rate shows little change from those of recent years with the exception of that for 1929, when influenza was epidemic in the first quarter.

Deaths of children of less than one year old numbered 7,851, and as the registered births of the year numbered 94,538, these deaths equal an infantile mortality rate of 83 per thousand births. This death-rate is

* Including 1 of unstated age.

† Including 4 of unstated age.

‡ Including 5 of unstated age.

4 less than that of the previous year, 4 less than the mean of those of the preceding five years, and 7 less than the mean of those of the preceding ten years. This is the fifth consecutive year in which the infantile mortality rate is found to be less than 90 per thousand. During the period 1855-1915 it was constantly over 100 and was eight times over 136.

The principal epidemic diseases death-rate for the year was 0·54 per thousand, which is 0·06 more than that of the previous year, but 0·11 less than that of the preceding five years and 0·25 less than that of the preceding ten years.

A general summary of the causes of death registered in Scotland during the year 1930 is given in Table IIA, and comparing the figures with those of the previous year it is found that deaths from measles show a considerable increase, while those from whooping-cough, influenza, tuberculosis, apoplexy, heart disease, bronchitis and pneumonia all show decreases.

Deaths from measles during the year numbered 792 as against 149 in the previous year, but those from whooping-cough were 628 as against 901, from influenza 696 as against 3,435, from all tuberculosis 4,285 as against 4,580, from apoplexy 6,483 as against 6,618, from pneumonia 5,681 as against 7,143, from bronchitis 3,777 as against 4,731, and from heart disease 8,934 as against 9,072.

Deaths from tuberculous disease in all numbered 4,285 and equalled a death-rate of 88 per 100,000. These deaths numbered 295 fewer than in the previous year and the death-rate is 6 less. Deaths attributed to tuberculosis of the respiratory system numbered 3,024 and equal a death-rate of 62 per 100,000. They are 264 fewer than in the previous year and the rate is 5 less. Both of these death-rates, that from all tuberculosis and that from tuberculosis of the respiratory system, are the lowest yet recorded. The death-rate from all forms of tuberculosis is 12 less than the mean of those of the preceding five years and 22 less than the mean of those of the preceding ten years, while that from respiratory tuberculosis is 8 less than the mean of the rates of the preceding five years and 14 less than the mean of those of the preceding ten years. Both rates are in marked contrast to what they were in earlier years. In the decade 1871-1880 the mean death-rate from all forms of tuberculosis was 354 per 100,000 and that from tuberculosis of the respiratory system 244 per 100,000.

Deaths from malignant disease in all numbered 7,120 and equalled a death-rate of 146 per 100,000. These deaths are 12 more than in the previous year, 271 more than the mean of the numbers of the preceding five years, and 622 more than the mean of those of the preceding ten years. The rate is the same as that for the previous year, but 6 more than the mean of those of the preceding five years and 13 more than the mean of those of the preceding ten years.

Deaths from diseases and accidents of pregnancy and childbirth numbered 661, and as the registered births of the year numbered 94,538, these deaths equal a death-rate of 7·0 per thousand births, which rate is 0·1 more than that of the previous year.

In the larger burghs taken collectively the birth-rate of the year was 20·4 per thousand, the marriage-rate 8·1 and the death-rate 13·8. In the previous year these rates were 20·1, 8·2 and 15·5 respectively. In the smaller burghs taken collectively these rates were 18·2, 7·0 and 13·4 respectively, as compared with 17·7, 6·7 and 14·8 in the previous year. In the county districts taken collectively these rates were 18·4, 4·6 and 11·9 respectively, as compared with 18·1, 4·5 and 12·9 in the previous year.

In the larger burghs taken individually the annual birth-rate ranged from 25·5 in Coatbridge, 23·9 in Hamilton and 22·9 in Greenock, to 15·4 in Dunfermline, 17·1 in Edinburgh and 17·3 in Perth. The marriage-rate ranged from 9·8 in Aberdeen, 9·4 in Perth and 8·6 in Glasgow and in Edinburgh, to 5·3 in Motherwell and Wishaw, 5·5 in Coatbridge, and 5·9 in Clydebank and in Hamilton. The death-rate in these burghs ranged from 15·9 in Dundee, 14·5 in Paisley and 14·3 in Glasgow, to 10·3 in Clydebank, 10·6 in Dunfermline and 10·9 in Falkirk.

Southern Do.	188297	180300	775	17·1	92	11·9	594	13·1	340	7·5	50	65

The principal epidemic diseases death-rate in the larger burghs ranged from 0·90 in Paisley, 0·89 in Greenock and 0·86 in Hamilton, to 0·22 in Perth, 0·24 in Dunfermline and 0·25 in Kirkcaldy.

The ages of those dying during the year are also shown in Table IIA, and comparison with the numbers in the previous year show reductions in all age periods with the exception of those in age groups 5-9 and 10-14, in which there were slight increases.

STATISTICS OF THE QUARTER ENDED 31ST DECEMBER 1930.

BIRTHS.

The births of 23,087 living children were registered during the fourth quarter of the year 1930. This number is 136 more than in the previous quarter and 1,089 more than in the corresponding quarter of last year, but is 623 less than the mean of the numbers for the fourth quarters of the previous five years and 2,705 less than the mean of those for the fourth quarters of the preceding ten years.

The Scottish birth-rate for the quarter was 18·8 per thousand. This rate is 0·1 more than that for the previous quarter and 1·0 more than that for the corresponding quarter of last year, but is 0·4 less than the mean of the rates for the corresponding quarters of the last five years and 2·1 less than the mean of those for the fourth quarters of the preceding ten years.

Of the 23,087 children whose births were registered during the quarter, 11,795 were males and 11,292 were females, the ratio of males to females being 104·5 to 100. In the first quarter of this year the ratio was 103·1 to 100, in the second quarter 103·9 to 100, and in the third quarter 102·2 to 100.

In the divisions of the counties the quarterly birth-rate ranged from 20·3 in the South-Western and 20·1 in the North-Eastern, to 14·3 in the Northern and 15·3 in the North-Western. In the East-Midland it was 17·3, in the South-Eastern 17·3, in the West-Midland 17·2 and in the Southern 17·1.

In the counties, burghs included, the quarterly birth-rate ranged from 22·8 in Wigtown, 21·6 in Banff and 21·2 in Moray, to 10·5 in Bute, 11·7 in Shetland and 11·8 in Argyll.

In the larger burghs taken collectively the quarterly birth-rate was 19·7 per thousand, in the smaller burghs 18·1 and in the county districts 17·7. In the previous quarter these three rates were 19·6, 17·5 and 17·9 respectively, while in the corresponding quarter of last year they were 18·9, 16·0 and 17·2 respectively.

In the burghs with populations of over 30,000 the quarterly birth-rate ranged from 26·2 in Coatbridge, 22·5 in Hamilton, 22·4 in Greenock and 21·0 in Glasgow, to 14·9 in Dunfermline, 16·8 in Edinburgh, 16·8 in Kilmarnock and 16·9 in Perth. In Dundee this rate was 19·8 and in Aberdeen 19·7.

In burghs with populations of between 10,000 and 30,000 the quarterly birth-rate ranged from 26·7 in Johnstone, 24·8 in Peterhead and 24·2 in Port-Glasgow, to 12·3 in Montrose, 13·7 in Gourock and 14·8 in Galashiels.

In the county districts with populations of over 10,000 the quarterly birth-rate ranged from 29·9 in Turriff District of Aberdeen, 24·9 in Ellon District of Aberdeen and 23·4 in Ayr District of Ayr, to 9·6 in Western District of Perth, 11·0 in Upper District of Renfrew and 11·2 in Skye District of Inverness.

Of the 23,087 births registered during the quarter, 21,512 or 93·2 per cent. were legitimate, while 1,575 or 6·8 per cent. were illegitimate. Compared with the numbers in the previous quarter legitimate children are 291 more, but illegitimate children are 155 fewer. Compared with the numbers in the fourth quarter of last year legitimate children are 1,147 more, but illegitimate children are 58 fewer. The illegitimate rate for the quarter, 6·8 per cent., is 0·7 less than in the previous quarter and 0·6 less than in the corresponding quarter of last year. The number of illegitimate children registered in this quarter is 105 less than the mean of those registered during the fourth quarters of the preceding five years and 244 less than the mean of those registered during the corresponding quarters of the preceding ten years.

In the divisions of the counties the illegitimate rate ranged from 12·5 in the North-Eastern and 11·9 in the Southern, to 5·0 in the South-Eastern, 5·8 in the North-Western and 5·8 in the West-Midland. In

the Northern it was 8·8, in the East-Midland 6·8 and in the South-Western 6·0.

In the counties, burghs included, the illegitimate rate ranged from 20·6 in Wigtown, 16·1 in Moray and 14·3 in Shetland, to 1·3 in Selkirk, 3·7 in West Lothian and 4·0 in East Lothian.

In the larger burghs taken collectively the illegitimate rate was 6·2, in the smaller burghs 6·4 and in the county districts 8·2. In the previous quarter these three rates were 6·5, 7·7 and 9·3 respectively, while in the fourth quarter of last year they were 6·8, 7·6 and 8·5.

In the larger burghs taken individually the illegitimate rate ranged from 8·8 in Perth, 8·5 in Dunfermline and 8·2 in Aberdeen, to 3·4 in Falkirk, 3·7 in Ayr and 4·3 in Hamilton.

In burghs with populations of between 10,000 and 30,000 the illegitimate rate ranged from 14·9 in Dumfries, 13·6 in Fraserburgh and 11·3 in Peterhead, to 0·0 in Cowdenbeath, 1·1 in Musselburgh and 1·4 in Renfrew.

In county districts with populations of over 10,000 this rate ranged from 26·5 in Rhins District of Wigtown, 20·8 in Turriff District of Aberdeen and 18·8 in Moray County District, to 0·0 in Central District of Perth, 1·6 in Carrick District of Ayr and 2·1 in Clackmannan County District.

Births registered in Scotland in October numbered 7,953, in November 7,041 and in December 8,093. The equivalent monthly birth-rate was 19·2 in October, 17·6 in November and 19·5 in December.

The quarterly birth-rate in England and Wales was 15·4 per thousand and in Northern Ireland 19·6, the former being 3·4 less than the Scottish rate, but the latter 0·8 more.

MARRIAGES.

Marriages registered in Scotland during the quarter numbered 8,210. This number is 1,322 less than in the previous quarter, 235 less than in the corresponding quarter of last year, and 226 less than the mean of the numbers for the fourth quarters of the preceding ten years, but is 198 more than the mean of the numbers registered during the fourth quarters of the preceding five years.

The quarterly marriage-rate was 6·7 per thousand. This rate is 1·0 less than that for the previous quarter, 0·1 less than that for the fourth quarter of last year, and 0·2 less than the mean of the rates for the fourth quarters of the preceding ten years, but is 0·2 above the mean of the rates for the fourth quarters of the preceding five years.

In the counties, burghs included, the quarterly marriage-rate ranged from 10·4 in Wigtown, 8·4 in Aberdeen and 8·3 in Dumfries, to 3·5 in Peebles, 4·3 in Dumbarton, 4·3 in Roxburgh and 4·3 in Sutherland.

In the larger burghs taken collectively the quarterly marriage-rate was 7·8, in the smaller burghs 6·9 and in the county districts 4·8. In the previous quarter these three rates were 9·8, 7·6 and 4·6 respectively, while in the fourth quarter of last year they were 8·2, 6·7 and 4·8.

In the larger burghs taken individually this rate ranged from 9·9 in Aberdeen, 8·6 in Ayr and 8·4 in Glasgow, to 4·7 in Clydebank, 5·1 in Coatbridge, 5·1 in Hamilton and 5·1 in Falkirk. In Edinburgh the rate was 8·3 and in Dundee 6·8.

In burghs with populations of between 10,000 and 30,000 this rate ranged from 15·5 in Inverness, 9·8 in Fraserburgh and 9·6 in Bo'ness, to 2·6 in Dumbarton, 3·3 in Cowdenbeath, 3·9 in Galashiels and 3·9 in Musselburgh.

In county districts with populations of over 10,000 the quarterly marriage-rate ranged from 12·0 in Annan District of Dumfries, 8·8 in Rhins District of Wigtown and 8·3 in St. Andrews District of Fife, to 1·4 in Lewis District of Ross and Cromarty, 1·5 in Skye District of Inverness and 2·2 in Central District of Perth.

Marriages registered in October numbered 2,327, in November 2,165 and in December 3,718. The equivalent annual marriage-rate was 5·6 in October, 5·4 in November and 9·0 in December.

DEATHS.*

Deaths registered in Scotland during the fourth quarter of the year numbered 15,985. They are 2,632 more than in the previous quarter and 632 more than in the corresponding quarter of last year, but 400 less than the mean of those registered during the fourth quarters of the preceding five years and 394 less than the mean of those registered during the fourth quarters of the preceding ten years.

The quarterly death-rate was 13·0 per thousand, being 2·1 above that for the previous quarter and 0·6 above that for the corresponding quarter of last year, but 0·3 below the mean of those for the fourth quarters of the preceding five years and 0·3 below the mean of the fourth quarters of the preceding ten years.

In the divisions of the counties the death-rate ranged from 14·9 in the Northern and 14·9 in the North-Western, to 11·2 in the West-Midland and 12·9 in the South-Eastern. In the East-Midland it was 13·1, in the South-Western 13·1, in the Southern 13·1 and in the North-Eastern 13·0.

In the counties, burghs included, the death-rate ranged from 17·4 in Sutherland, 17·1 in Caithness and 16·6 in Selkirk, to 6·4 in Peebles, 10·4 in Dumbarton and 10·6 in Stirling.

In the larger burghs taken collectively the death-rate was 13·9, in the smaller burghs 13·1 and in the county districts 11·6. In the previous quarter these three rates were 11·1, 11·3 and 10·3 respectively, while in the fourth quarter of last year they were 13·4, 12·2 and 11·1.

In the larger burghs taken individually the death-rate ranged from 15·4 in Kilmarnock, 15·2 in Dundee and 15·2 in Paisley, to 9·3 in Dunfermline, 10·1 in Clydebank and 10·4 in Motherwell and Wishaw.

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

In burghs with populations of between 10,000 and 30,000 this rate ranged from 18·0 in Inverness, 16·7 in Galashiels and 16·5 in Johnstone, to 7·7 in Cowdenbeath, 8·1 in Musselburgh and 8·9 in Renfrew.

In county districts with populations of over 10,000 the death-rate ranged from 17·8 in County District of Sutherland, 17·7 in Mid-Ross District of Ross and Cromarty and 16·9 in Highland District of Perth, to 7·7 in Ellon District of Aberdeen, 8·0 in Calder District of Midlothian and 8·2 in Western District of Dumbarton.

Of the 15,985 deaths registered during the quarter, 7,980 were of males and 8,005 were of females, the male death-rate being 13·5 per thousand and the female death-rate 12·5 per thousand. Deaths registered in October numbered 4,664, in November 4,997 and in December 6,324. The monthly death-rate in October was 11·3 per thousand, in November 12·5 and in December 15·3. Last year these three rates were 11·8, 12·1 and 13·3 respectively.

The quarterly death-rate in England and Wales was 11·5 per thousand and in Northern Ireland 13·3 per thousand, the former being 1·5 less than the Scottish rate but the latter 0·3 more.

AGES OF THOSE DYING.

Of the 15,985 persons whose deaths were registered during the quarter, 2,700 or 16·9 per cent. were children aged under five years, 6,466 or 40·5 per cent. were persons aged 5 to 64, while 6,818 or 42·6 per cent. were persons aged 65 and over. The age of one person was not stated. Compared with the numbers in the corresponding quarter of last year deaths of children under five years are 200 more, of persons aged 5 to 64, 43 more, and of persons aged 65 and over 388 more.

Deaths of children of less than one year old numbered 2,070, and as the births registered during the quarter numbered 23,087, these deaths equal an infantile mortality rate of 90 per thousand registered births. These deaths are 712 more than in the previous quarter and 302 more than in the corresponding quarter of last year. The infantile mortality rate of the quarter is 31 more than that of the previous quarter and 10 more than that for the corresponding quarter of last year, but is 2 less than the mean of the rates for the fourth quarters of the preceding five years and 2 less than the mean of those for the fourth quarters of the preceding ten years.

In the divisions of the counties the infantile mortality rate ranged from 107 in the South-Western and 83 in the North-Eastern, to 55 in the North-Western and 65 in the Southern. In the East-Midland it was 81, in the Northern 76, in the West-Midland 69 and in the South-Eastern 68.

In the counties, burghs included, this rate ranged from 113 in Lanark, 107 in Renfrew and 106 in Kincardine, to 17 in Peebles, 28 in Nairn and 33 in Moray.

In the larger burghs taken collectively this rate was 106, in the smaller burghs 82 and in the county districts 66. In the previous quarter

these three rates were 64, 53 and 54 respectively, while in the fourth quarter of last year they were 91, 68 and 68.

In the larger burghs taken individually this rate ranged from 127 in Paisley, 124 in Dundee, 124 in Motherwell and Wishaw and 121 in Glasgow, to 34 in Falkirk, 47 in Kirkcaldy, 56 in Dunfermline and 66 in Perth.

The infantile mortality rate for the quarter in England and Wales was 61 and in Northern Ireland 72, the former being 29 below the Scottish rate and the latter 18 below.

CAUSES OF DEATH.

Of the 15,985 deaths registered during the quarter, 496 or 3·1 per cent. were attributed to the principal epidemic diseases. These deaths included 6 from enteric fever, 39 from measles, 29 from scarlet fever, 120 from whooping-cough, 139 from diphtheria and 163 from the diarrhoeas of childhood. Compared with the numbers in the previous quarter deaths from diphtheria are 67 more, from whooping-cough 27 more and from scarlet fever 3 more, but those from enteric fever are 2 fewer, from the diarrhoeas of childhood 25 fewer and from measles 27 fewer. Compared with the numbers for the fourth quarter of last year, deaths from whooping-cough are 39 more and from diphtheria 4 more, but those from enteric fever number the same, while those from scarlet fever are 10 fewer, from the diarrhoeas of childhood 16 fewer and from measles 57 fewer.

The principal epidemic diseases death-rate for the quarter was 40 per 100,000, which is 3 more than in the previous quarter but 3 less than in the corresponding quarter of last year. The quarterly death-rate from the diarrhoeas of childhood was 13 per 100,000, from diphtheria 11, from whooping-cough 10, from measles 3 and from scarlet fever 2.

In the counties, burghs included, this rate ranged from 1·0 per thousand in Kinross, 0·7 in Clackmannan, in Kincardine and in Sutherland, to 0·0 in six counties.

In the larger burghs this death-rate ranged from 0·8 in Aberdeen, 0·7 in Glasgow, and 0·5 in Coatbridge and in Hamilton, to 0·0 in Dunfermline and in Kirkcaldy and 0·1 in Falkirk.

Deaths from epidemic diseases other than those grouped as the principal epidemic diseases included 6 from paratyphoid fever, 42 from erysipelas, 1 from acute poliomyelitis, 28 from encephalitis lethargica and 37 from cerebro-spinal meningitis. Compared with the numbers for the previous quarter deaths from erysipelas are 9 more, but those from paratyphoid fever are 2 fewer, from acute poliomyelitis 6 fewer, from encephalitis lethargica 6 fewer, and from cerebro-spinal meningitis 6 fewer.

Deaths from influenza in all numbered 170, of which 33 were attributed to influenza as the sole cause and 137 to influenza along with some contributory cause. In the previous quarter the total number was 73, of which 11 were attributed to influenza as the sole cause.

Deaths from all forms of tuberculosis numbered 972, constituted 6·1 per cent. of the total deaths and equalled a death-rate of 79 per 100,000. These deaths numbered 33 more than in the previous quarter but 4 fewer than in the corresponding quarter of last year. This death-rate is 3 more than in the previous quarter but is the same as that for the fourth quarter of last year. Of these deaths 731 were ascribed to tuberculosis of the respiratory system, 94 to tuberculous meningitis, 59 to abdominal tuberculosis and 88 to other forms of tuberculosis. Compared with the numbers for the previous quarter deaths from respiratory tuberculosis are 67 more and from abdominal tuberculosis 2 more, but those from tuberculous meningitis are 31 fewer and from other tuberculosis 5 fewer. The quarterly death-rate from tuberculosis of the respiratory system was 59 per 100,000, being 5 more than in the previous quarter and 3 more than in the corresponding quarter of last year.

Deaths from malignant disease numbered 1,809, constituted 11·3 per cent. of the total deaths for the quarter, and equalled a death-rate of 147 per 100,000. These deaths are 68 fewer than in the previous quarter and 4 fewer than in the fourth quarter of last year.

Deaths from pneumonia exclusive of those associated with influenza numbered 1,463, constituted 9·2 per cent. of the total deaths for the quarter, and equalled a death-rate of 119 per 100,000. These deaths are 715 more than in the previous quarter and 223 more than in the corresponding quarter of last year.

Deaths from bronchitis exclusive of those associated with influenza numbered 977, constituted 6·1 per cent. of the total deaths for the quarter, and equalled a death-rate of 79 per 100,000. They numbered 526 more than in the previous quarter and 237 more than in the corresponding quarter of last year.

Deaths from diseases and accidents of pregnancy and childbirth numbered 157, being 3 more than in the previous quarter and 27 more than in the fourth quarter of last year. These deaths equal a death-rate of 6·8 per thousand registered births, which is 0·1 more than in the previous quarter and 0·9 more than in the fourth quarter of last year.

Deaths from violence numbered 713, constituted 4·5 per cent. of the total deaths for the quarter and equalled a death-rate of 58 per 100,000.

Deaths attributed to accidents with motor vehicles numbered 197, being 36 fewer than in the previous quarter, but 4 more than in the corresponding quarter of last year.

Deaths from ill-defined causes numbered 201, and those of which the causes were either not specified or merely described as "natural causes" numbered 59. In the previous quarter deaths from ill-defined causes numbered 179 and those from unspecified causes 41. In the fourth quarter of last year they numbered 212 and 44 respectively.

TABLE A.—BIRTH-, DEATH-, AND MARRIAGE-RATES OF THE COUNTIES OF SCOTLAND
DURING THE QUARTER ENDING 31ST DECEMBER 1930.

COUNTIES.	Population estimated to middle of 1930.	Rates per 1000 of Estimated Population.				Illegiti- mate Births per cent. of Total Births.	Infantile Mor- tality Rate per 1000 Births.
